

SPORT IMPACT

HEAVY WORKOUTS? NO WORRIES.

SPORT IMPACT IS A DOUBLE-LAYERED VULCANIZED RUBBER FLOORING WITH AN EXTRA-THICK SURFACE LAYER THAT CAN RESIST WEAR FROM HEAVY WEIGHTS AND THE MOST INTENSE SPORTS ACTIVITIES.

CO-VULCANIZED MULTI-LAYER DUAL DUROMETER

Our sport surfaces are made from two layers of solid rubber vulcanized together to form a continuous, seamless surface.

SPORT IMPACT

Whether athletes are powerlifting, core training or using free weights, nothing other than their own fatigue should limit the intensity of their workouts. Sport Impact ensures the best surface for strength training exercises, capable of absorbing even the heaviest impact, and offering incomparable safety and comfort.

A weightlifting platform must provide support at the moment of maximum effort. It has to be stable, uniform, and comfortable, so users can fully concentrate on their workouts. Sport Impact's two vulcanized layers not only absorb even the most violent impact from free weights, they also reduce muscle stress and support leg exertion. It's a uniform and incredibly weight-resistant solution to support the most intense training.

Even before skaters hit the ice, their blades give arena flooring a serious workout. With its 3 millimeter wear layer, Sport Impact resists abrasions and cuts, and it's perfect for common areas and dressing rooms as well.

UNSURPASSED WEIGHT RESISTANCE

With its extra-thick 3 millimeter wear layer, Sport Impact resists traction, lacerations, and heavy loads. Ideal for even the most intense sports activities, it ensures athletes excellent stability due to the embossed non-porous surface, and the underlayer guarantees uniform shock absorption and dimensional stability.
