

Dominique Wilkins Signature Series

Slam Dunk

FIXED RESILIENT SYSTEM

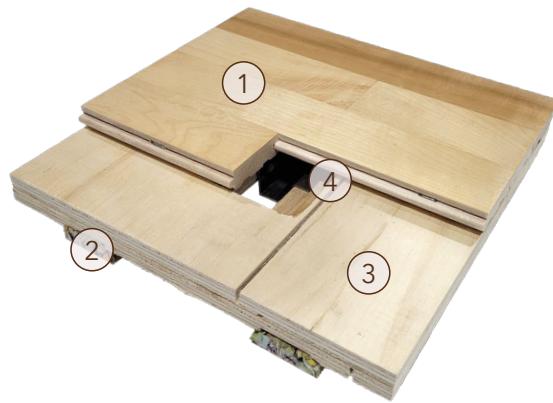

Slam Dunk features Acer's MFMA certified maple over CNC milled, pre-manufactured subfloor panels. The panel's proprietary fluted grooves work in conjunction with resilient foam to provide optimal load response and shock absorption. Steel hat channels and concrete anchors minimize dead spots and enhance ball rebound performance.

Dominique Wilkins

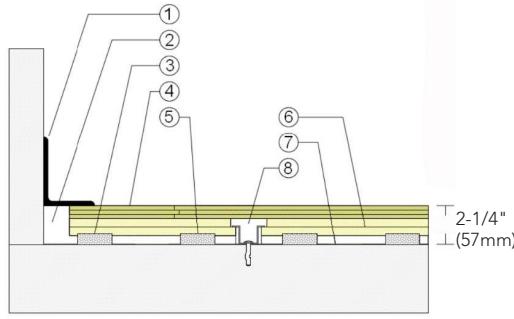

Dominique Wilkins Signature Series

Slam Dunk

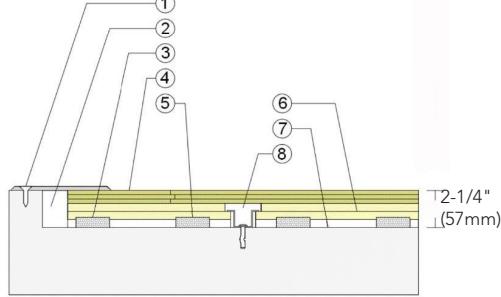

1. Precision-milled Acer Maple
 2. Resilient Cushion
 3. Pre-assembled Subfloor Panel
 4. Steel Channel and Concrete Anchorage

WALLBASE

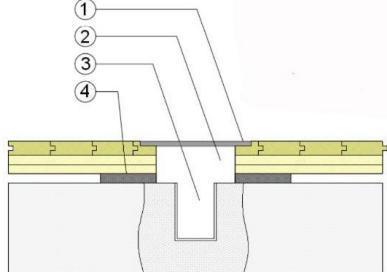

1. 3" x 4" (76mm x 101mm) Vent Cove Base
2. 1-1/2" (38mm) Min. Expansion Space
3. Recessed Subfloor Groove
4. 25/32" (20mm) MFMA Maple Flooring
5. Lineal Resilient Cushion
6. Pre-assembled Subfloor Panel
7. Concrete Surface Vapor Retarder
8. Steel Channel and Concrete Anchors

THRESHOLD

1. 1/4" (6mm) Aluminum Threshold
2. 1-1/2" (38mm) Min. Expansion Space
3. Recessed Subfloor Groove
4. 25/32" (20mm) MFMA Maple Flooring
5. Lineal Resilient Cushion
6. Pre-assembled Subfloor Panel
7. Concrete Surface Vapor Retarder
8. Steel Channel and Concrete Anchors

EQUIPMENT

1. Floor Plate
2. 1-1/2" (38mm) Min. Expansion Space at all Inserts & Electrical Penetrations
3. Concrete Floor Penetration
4. Solid Blocking at Insert

Anchorage
 Steel Channel and Concrete Anchorage
